

## **920 Tons Diverted from the land fill**

SeaCa Packaging Inc. with the assistance of retailers across the country have reduced the impact of packaging on the environment by supporting producers to switch from waxed corrugated cartons to e-Corr waterproof packaging.

In 2016 we supplied producers 736,000 celery cartons and were able to positively effect the environment by the reduction in environmental carbon and the elimination of land fill weight. Producers were also able to save 460T of shipping weight.

Retailers were able to save on the cost of disposal of waxed cartons and gained revenue in selling their used polypropylene cartons to local recyclers.

The following chart highlights the benefits achieved by the environment in using E-Corr Celery packaging.

### **736,000 E-Corr Celery Cartons shipped in 2016**

|  |                  |
|--|------------------|
| <b>Tons of Carbon reduced:</b>                       | <b>362T</b>      |
| <b>Tons of shipping weigh saved:</b>                 | <b>460T</b>      |
| <b>Tons of Landfill weight reduced:</b>              | <b>920T</b>      |
| <b>Cost saved by avoiding landfill tipping fees:</b> | <b>\$110,400</b> |
| <b>Revenue gained by recycling plastic:</b>          | <b>\$119,600</b> |

SeaCa Packaging Inc. remains committed to continue the reduction in our environmental impact for the packaging we produce for the agricultural industry.
